

## Reverse Osmosis Drinking Water System

Relax and enjoy the benefits of great tasting water supplied by a reverse osmosis drinking water system. Remember that good quality water is important to maintaining a healthy lifestyle. You can also feel good about the money you have saved by installing your own drinking water system instead of dealing with the expense and hassle of bottled water delivery.

Although this product is described as a 'Drinking Water System', the purified water produced by the reverse osmosis (RO) process can be used for many purposes around the home.

- ◆ **Drinking Water** - keep a container of RO water in the fridge to be able to enjoy the clean, fresh taste. Alternatively, take it directly from the tap.
- ◆ **Ice Cubes** - use RO water to fill ice cube trays. Ice cubes made from RO water are typically clearer and better tasting than ice made from plain tap water.
- ◆ **Automatic Ice Makers** - a water line from the RO system can be plumbed to refrigerators with automatic icemakers. Additional accessories required to complete this connection are not included. Please consult the refrigerator's owner's manual on this installation.
- ◆ **Kettles & Coffee Makers** - plain tap water eventually causes films and scale in these devices that is difficult to clean. RO water is very low in dissolved minerals content, greatly reducing the chance of scale buildup.
- ◆ **Cooking** - use RO water for boiling pasta, rice or any other recipe that calls for water in the instructions.
- ◆ **Washing Fresh Fruit & Vegetables** - prevent tap water minerals from being deposited onto food to maintain freshness.
- ◆ **Family Pets** - allow your dog or cat to enjoy the same purified water you do.
